A team of experts present a range  
of new colours

# ArchitecturalSeries

Colour is important. That's why we gathered a team of industry professionals to help select a new range of colours for our New Zealand-made steel, a range selected by the experts, for the experts. This ArchitecturalSeries consists of seven colours, each reflecting an aspect of the flora, fauna and landscapes of New Zealand.

Our ArchitecturalSeries is a contemporary take on natural colours, providing the freedom to design and create in even the most diverse of environments. We want to make it as simple as possible to incorporate a distinctly local hue into your designs. So now we're handing you the palette to express the inherent structural and natural beauty of New Zealand.

## MADE IN NEW ZEALAND BY NEW ZEALAND STEEL

COLORSTEEL® prepainted steel has protected New Zealand homes for over 30 years. With contemporary architectural colours and proven performance, COLORSTEEL® prepainted steel is the smart choice when it comes to roofing and cladding your home.

COLORSTEEL® prepainted steel has been extensively tested and proven in some of New Zealand's most extreme UV, wind, rain, snow and ice environments. All COLORSTEEL® prepainted steel systems have undergone extensive long-term exposure testing to ensure colour performance and durability.

With its hard-wearing, baked-on paint finish, COLORSTEEL® prepainted steel is designed to impede flaking, peeling and fading to deliver long-term, low maintenance performance.

Non-combustible, lightweight and secure, COLORSTEEL® prepainted steel is designed to protect your home for many years to come.

All New Zealand Steel products are produced under the ISO9001 quality management system, ensuring consistency and reliability.

## THE ARCHITECTURAL SERIES COLOURS ARE AVAILABLE IN COLORSTEEL® ENDURA® AND COLORSTEEL® MAXX®.

- Installing COLORSTEEL® roofing and cladding
- COLORSTEEL® roofing and cladding maintenance

## COLORSTEEL® Endura®

COLOUR FOR THE FUTURE

COLORSTEEL® Endura® prepainted steel is perfectly suited to exterior architectural applications including roofing, cladding, garage doors, spouting and fencing.

The AZ150 ZINCALUME® substrate has a zinc/aluminium alloy coating of 150g/m<sup>2</sup>, providing corrosion protection over your entire roof, including galvanic protection on cut edges. The durable primer and baked-on paint finish ensures your home will continue to look great well into the future.

COLORSTEEL® Endura® prepainted steel is the perfect choice for mild, moderate and severe environments throughout New Zealand. It is the ideal, cost-effective roofing and cladding choice for most residential homes and commercial buildings located in New Zealand's inland environments.

## COLORSTEEL® Maxx®

COLOUR FOR THE EXTREME

COLORSTEEL® Maxx® prepainted steel has been specifically developed to withstand higher atmospheric salt concentrations found near New Zealand's rugged coastal environments.

The AZ200 ZINCALUME® steel substrate has a 200g/m<sup>2</sup> zinc/aluminium alloy coating, providing greater corrosion protection over your entire roof, including galvanic protection on cut edges. A corrosion resistant primer and baked-on paint finish add further protection, ensuring your roof looks great and will endure the harsh New Zealand elements for many years to come.

COLORSTEEL® Maxx® is compatible with most photovoltaic systems installed as independent panels when separated from the roof in accordance with guidance given in *Guide to good practice – steel roofing and photovoltaic panels*.

All standard\* colours in the range are optimised for solar reflectance. When combined with standard insulation levels, solar reflectance technology can help maintain greater thermal comfort all year round, while using less energy.

\*Excluding Ebony, KowhaiGlow™ and FlaxPod™.

“A colour needs to connect,  
it needs to tell a story.”
